the professional
labeling software

NiceWatch Enterprise

Add label printing to your existing
IT system

- Superb printing performance
- Server based solution simplifies maintenance
- User-friendly label designer

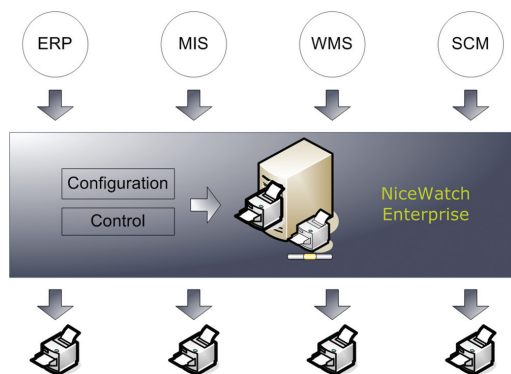

www.nicelabel.com

NiceLabel

When your existing IT system does everything but print labels, the main goal of the IT manager is to provide label printing without disturbing the other processes and by using data which is currently available.

NiceWatch Enterprise is a server based application that allows you to add label printing capability to your business operations without needing to make changes to existing applications.

ADD LABEL PRINTING TO YOUR SYSTEM WITHOUT CHANGING APPLICATIONS YOU ALREADY USE

- One server installation supports all printers in the enterprise
- Complete printer model independence
- Advanced user-friendly graphical designer
- Central maintenance through Enterprise Print Manager

SUPERVISE AND MANAGE YOUR PRINTING SYSTEM FROM A CENTRAL LOCATION

Real-time printer management minimizes the risk of production line stalls. Immediate notification about label printing stalls or errors is the best first step in solving them.

GRAPHICAL DESIGNER

NiceWatch Enterprise includes a graphical designer, which lets you make layout changes or create new labels quickly and efficiently.

PERFORMANCE PRINTING

NiceWatch Enterprise is built to perform even in the most demanding environments. It can print continuously on multiple printers and doesn't add a bottleneck to high-speed operations.

SCALABILITY

NiceWatch Enterprise has no limit on the number of connected printers or users.
