

Introducing...

# Scan And Say™

A TALKING barcode package designed to aid the Visually Impaired.

Tired of opening a can of corn instead of a can of green beans?

Ever needed to know which medication to take? Ever wanted to know which flavor ice cream is in the freezer?

If so, then *Scan And Say* can help!

*Scan And Say* is a **TALKING barcode package** for your Windows based PC. It allows a sight-impaired person to scan a barcoded item and hear the product's description over their PC's speakers. You can even produce a shopping list of items that can be used by a sighted person at the grocery store. **EASY TO USE!** No mouse required! All features are activated using your keyboard.

<p>Scan Product</p> <p>Scan Bar Code <input type="text" value="021000633555"/></p> <p>kraft blue cheez</p> <p>1. Repeat    2. Edit Descriptions    3. System Setup</p> <p>4. View Shopping List    5. ## Scan And Say Features:

- The omni-directional scanner provided with *Scan And Say* has 20 scan lines, just like in the grocery store. This allows anyone to be able to scan a product's barcode without needing to see where the barcode is located.
- You can use the manufacturer's descriptions that come with *Scan And Say* or you can enter your own! Example – instead of hearing “*Breyer's Ice Cream, Mint Chocolate Chip*”, you can have it say “*My favorite ice cream*”.
- The *Scan and Say* voice is easy to understand and clearly reads the products description from the database of approximately 500,000 products. **You can easily add new products in the future AND you can add descriptions for items without barcodes using the 500 pre-printed barcode labels (included).**
- You can print a shopping list using an on-screen menu option. On-screen words are EXTRA LARGE in order to aid partially sighted people.
- *Scan and Say* will announce the shopping list when it appears on your screen. Additionally, ALL fields and buttons are optionally announced as you TAB to them.
- You can optionally TIME-STAMP items as they are scanned. That TIME-STAMP can then be optionally read aloud the next time an item is scanned. This is especially helpful for remembering when you last took a medicine.

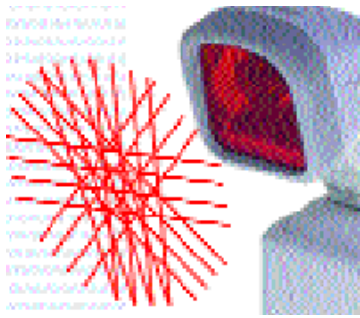

Scanner can be used as a portable hand-held device or.....

Scanner can be mounted using the adjustable stand.

## RVB Systems Group

### *Scan And Say* includes:

- ✓ An omni-directional barcode scanner that emits a spider web of 20 scan lines for automatic scanning
- ✓ Adjustable scanner stand.
- ✓ 500 pre-printed labels that can be used on non-bar-coded items.
- ✓ A database containing approximately 500,000 grocery store / drug store over the counter items.
- ✓ User's manual (written AND Audio WAV file).
- ✓ Fully automatic software installation CD.

### *Scan and Say* Minimum Requirements

- IBM Compatible PC
- Win 95/98/2000/NT/ME or XP
- Pentium 60
- 16 MB RAM
- CD-ROM Drive
- 165 MB Hard Drive Space
- Windows Media Player or comparable software capable of playing .WAV files
- PS2 keyboard
- Speakers
- Microsoft Access 2000 (fully licensed runtime version included on *Scan and Say* installation CD)

A screenshot of a Windows-style dialog box titled "Scan And Say Setup Form". The form is divided into several sections with radio button options. The "Shopping List Options" section has three options: "Add scanned barcodes to shopping list (after 1 scan)", "Add scanned barcodes to shopping list (after 2 scans)", and "Do NOT add scanned barcodes to shopping list". The "Announce Buttons on Forms" section has two options: "Announce button and field descriptions on Scan and Say forms" and "Do not announce button and field descriptions". The "Time Stamp Options" section has three options: "Announce time stamps only for medicines", "Do not announce time stamps", and "Announce time stamps for all items". The "Barcode Announce Options" section has two options: "Announce descriptions for barcodes" and "Announce barcode numbers". The "Voice Speed" section has five options: "Very Slow", "Slow", "Normal", "Fast", and "Very Fast". At the bottom of the form is a "CLOSE FORM" button.

*Scan And Say* is available from RVB Systems Group and is priced at **\$395** plus shipping.

*Scan And Say* comes with a 30-day money back guarantee.
