DEFINITIONS:

Permanent Adhesive: A general purpose permanent acrylic adhesive that can be applied to surfaces at temperatures of +25°F. All labels include this adhesive unless otherwise noted.

Freezer-Grade Adhesive: A general purpose permanent acrylic adhesive that can be applied to surfaces at temperatures down to -20°F.

Premium Direct Thermal: This material is a top-coated medium sensitivity product with excellent image quality and provides excellent results in most environmental conditions. We recommend that any direct thermal material be tested by the end user before ordering large quantities.

Standard Direct Thermal: This material is an uncoated medium sensitivity product with excellent image quality. Because this material is uncoated, it should be tested by the end user before ordering large quantities. This product should not be used in applications that require extreme environmental resistance.

Direct Thermal VL (Visible Light): Most common direct thermal technology, used with standard direct thermal chemistry.

Direct Thermal NIR (Near Infrared): Dyes added to absorb light at 670-700 nm. Designed to filter out minor amounts of contaminants. Used primarily in parcel tracking industry

Stock labels are non-returnable.
